FAO FISHERIES DIVISION BIOLOGY BRANCH DOCUMENTS

Three series of documents are issued by the Biology Branch. These are not official FAO publications; they are given a restricted external distribution and this fact should be indicated if they are cited. Most of the documents in these series are prepared as working papers for meetings, or are summaries of information for the use of member governments, organizations, and specialists concerned. The series are:

FAO Fisheries Biology Report	FB/R (No.)
FAO Fisheries Biology Synopsis	FB/S (No.)

Special groups of synopses are identified by the following symbols:

CART	Information concerning the living aquatic resources of certain countries and regions
SAST	Data concerning certain species and fish stocks
MAST	Methods and subjects synopses
OT	Oceanography synopses
IT	Limnological synopses

FAO Fisheries Biology Technical Paper FB/T (No.)

Special groups of Technical Papers are identified by the following symbols:

RE	Indexed lists of names and addresses of experts drawn from the Register of Experts maintained by Biology Branch
CB	The World List of Periodicals for Aquatic Sciences and Fisheries, Meetings and Activities Section from and the Handbook for the Current Bibliography for Aquatic Sciences and Fisheries, and technical papers concerning documentation and bibliographic problems.

Numbers following the symbols are for classifying the document, using the codes of the indexes to the Current Bibliography for Aquatic Sciences and Fisheries.

Some documents may carry other identification numbers, if, for example, they have been contributed to a meeting for which papers have been marked according to another system; in requesting copies it is sufficient, however, to quote the "FB" number given at the top right-hand corner of the title page.

PURPOSE OF THIS SERIES

This is one of a series of technical papers in which are listed the names and addresses of persons known to FAO to be conducting research on, or interested in, a particular subject within the general field of aquatic sciences and fisheries research. Each list is extracted from the Register of Experts maintained in Fisheries Biology Branch. This register consists of a set of edge-notched cards based on Information Forms which have been completed and returned by corresponding scientists. Appended indexes to the list are prepared according to the information entered on the cards, which may be sorted according to place of residence, language facility, subject fields of experience, species group studied and other attributes.

The first version of a list is prepared from names already in the Register of Experts to which may be added other names such as the authors of documents entered in the Current Bibliography for Aquatic Sciences and Fisheries dealing with the particular subject, as indicated by its Taxonomic and Subject Indexes.

The first, and each subsequent, version of a list is revised by sending a copy to each person named in it with a request for suggestions for the names of additional persons to whom information forms are subsequently sent.

Entries in the list are numbered serially, and these numbers are used for reference in the indexes, which follow, where possible, the codes used in the Current Bibliography indexes. The names and addresses are set out in such a way that they can be cut out and used for index cards or mail labels. Extra copies of lists can be obtained by application to:

PREPARATION OF THIS DOCUMENT

First draft prepared as first stage in fulfillment of EIFAC recommendation for compilation of a directory of fishery workers in Europe. Contains names of persons who had returned Information Forms by 2 October 1961, or who were known to EIFAC Secretariat (designated by an asterisk) because of their activity in the subject field. "Europe" is defined as in the Current Bibliography geographic code, with the addition of Israel, a member of EIFAC. To be revised for submission to the 2nd EIFAC meeting to be held in Paris 7-12 May, 1962.

Distribution:
